## NOTICE TO PATIENTS – TRAVEL IMMUNISATIONS

We recommend patients attend a Private Travel Clinic to confirm which travel vaccinations are required prior to contacting the surgery.

The surgery is commissioned to offer the following free-of-charge travel vaccinations only:

- Polio (Given as a combined Diphtheria/Tetanus/Polio vaccination)
- Typhoid
- Hepatitis A
- Cholera

All other vaccines should be arranged privately at your own expense. We do not hold or administer any other travel vaccines.

We have a limited number of appointments available and we require at least six weeks notice prior to departure to carry out mandatory checks required, allow an appropriate interval between vaccinations if needed, and ensure that you are offered appropriate advice.

We regret that we cannot offer travel vaccinations to temporary residents or overseas visitors.
